SWORKz S35-4E INSTRUCTION MANUAL

S35-4E

1/8 Off Road Brushless Power Pro Buggy

INSTRUCTION

The SWORKz S35-4E 1/8 Electric is designed for pure racing. The geometry of the car provides optimized corner speed compared with easy handling and maximum traction.

The S35-4E features a T7075 hard anodized and lightened aluminium chassis with a wide layout that was tested for a long time by our factory pilots to guarantee the best performance.

The totally new developed HET differentials are included too and provide a traction, that is not possible with old systems. We also included the new special middle brace system.

The new S35-4E comes with a lower shock layout in front and rear and the construction of the shocks is adapted to that new optimized layout. The fixed shock spring plates will make it almost impossible to lose them anymore.

The steering geometry, with new Ackerman and steering plates, gives the driver the feeling of total control over the S35-4E. The position of the steering servo is completely redesigned and optimized.

With the toe in plates, which now contain square inserts, you can adjust the geometry of your SWORKz S35-4E to fit to every track layout and track condition. Lower arms in front and rear are made of a newly developed composite material and fit exactely to the new chassis geometry. Side guards were redesigned in the same way.

With the new lightened wing support you can adjust position and angle of the wing to give your SWORKz S35-4E the perfect balance on the track. Together with the optimized new body shell, the aerodynamic system is working perfectly together.

Another new development in our SWORKz S35-4E is the totally new rear hub. Composite material combined with Carbon plates gives you the possibility for various setups. The newly developed Composite material is working perfectly together with the HET differentials to provide maximum traction.

The new designed Motor mount makes it possible to change very easily the motor or adjust the play of the gears. There many more small changes and smart ideas in your new SWORKz S35-4E, that make the car being a real winner.

We also included the new special middle brace system.

The position of the steering servo is completely redesigned and optimized.

The new designed Motor mount makes it possible to change very easily the motor or adjust the play of the gears.

The secret of a modern racing car is the possibility to adapt the setup to every track for top pilots but also have a standard setup that works on most tracks for hobby pilots.

And your SWORKz S35-4E is having these two characteristics in perfection.

The SWORKz development team focused on using materials, corresponding to the highest quality standards, when designing the car. You will find only 100% SWORKz quality in the S35-4E kit.

Congratulations on your purchase of the new SWORKz S35-4E 1/8 scale off-road racing buggy pro kit and thanks for trusting in SWORKz.

Please read this manual carefully, before you start to build and drive your SWORKz S35-4E. This manual contains step-by-step instructions to helping you completing, preparing and fine tuning your buggy for racing. Updates, setups, and product news will be posted on all SWORKz digital media.

As always, if you should ever have any questions or need help with your SWORKz products, please feel free to contact our official SWORKz dealers and distributors.
